Projects

Inventory Management System

The primary goal of an Inventory Management System is to ensure that a company maintains optimal levels of inventory, which means having enough stock on hand to meet customer demand while minimizing excess or obsolete inventory that ties up capital.

🎯 Target : Web

👨‍💻 Technology : Node.js, Nest.js, React.js, Redux, PostgreSQL

Office ERP Management System

ERP systems are typically used to integrate and manage core business functions such as finance, human resources, supply chain management, project management, and more. These systems provide a centralized platform for data and process management, offering real-time visibility into an organization's operations and facilitating data-driven decision-making.

🎯 Target : Web

👨‍💻 Technology : Node.js, Nest.js, React.js, Redux, PostgreSQL

School Management System

These systems are used to manage various aspects of school operations, including student information, staff management, financial management, and communication.

🎯 Target : Web

👨‍💻 Technology : Node.js, Nest.js, React.js, Redux, PostgreSQL
